

Sam Farrington

JS_2 Deliverable

- Github URL: https://samfarrington-tufts.github.io/js2/js_part2.html
- I was able to complete all the problems of the assignment.
- The most satisfying part of this assignment was figuring out how to get the correct prefix on Problem 5. I got stuck for a while trying to figure out how to store the correct prefix depending on which button was pushed. I saw some examples on Stack Overflow that used methods we haven't discussed, but I didn't want to use something I didn't understand. I implemented the speak() function using the "this" keyword to store the value of the button pushed in another variable. Unlike Problem 4 where I could make a rule to call speak() with a set prefix depending on the button, I needed to store the prefix at the time of the button push and the "this" keyword was perfect for this functionality. While it is a simple concept, using the "this" keyword to solve Problem 5 was very satisfying and made implementing the solution a lot easier.
