

CS 120 Web Programming

Project 1: Cover Band Website

Tasks

Create a small website for a cover band (for example, a wedding or party band)

Objectives

Understand the elements to pull together a simple website- and get it online.

Requirements

The site must be for a cover band/wedding band etc

- ✖ You should adhere to the usability guidelines PPT
 - ✖ You must have at least 4 pages: a home page, a contact page, and two other pages.
Some suggestions for other pages are
 - List of band members with a bio/image
 - Song list with artists
 - Schedule of events
 - ✖ Content must be "real" and realistic. Lorum Ipsum text is not acceptable. You may use AI generated content as long as it fits with the rest of the site – ie, you may need to massage it.
 - ✖ At least 12 CSS style rules
 - ✖ A form
 - ✖ A table
 - ✖ A list
 - ✖ An external stylesheet
 - ✖ An internal stylesheet on at least one page
 - ✖ An inline style
 - ✖ Two images – one must be a background image.
The file size of the images must be less than 60k unless it is for a banner – then it can be up to 110k.
 - ✖ At least two fixed page elements to make the site look consistent - for example: header, navigation, sidebar or footer. Note that Navigation and Header cannot both count if the nav is in the header.
 - ✖ The site must be responsive **and** look good on a phone.
 - ✖ Read this article (<https://blog.hubspot.com/marketing/mobile-friendly-test>) and choose one tool to check that your site is mobile friendly – be sure to note which one you used and screenshot the results.
-

Ground Rules

You may meet multiple requirements with one item on the site.

You may adapt content from an existing website or use Generative AI to create content – if you do, please cite your source(s) in the design document.

You may not use Generative AI for ANY code including HTML/CSS.

You may choose to use GitHub hosting or SiteGround hosting – you do not need both.

It is ok if images have watermarks on them.

This is not a design class, but you are expected to use reasonable aesthetics, and the site should adhere to usability principles. See the posted usability document for best practices.

Rubric

Site runs online and meets all requirements - 60 points

Quality of HTML/CSS code, Effort, Adherence to usability best practices - 30 points

Deliverables: 10 points

Deliverable Worksheet (Must be submitted on Canvas)

- ❏ Home page design document (from assignment 1) uploaded
- ❏ All html/css files (combine into a compressed/zip file)
- ❏ URL for Project 1
URL: <https://samfarrington-tufts.github.io/p1/home.html>

Project requirements- check off those you completed. Add detail where requested.

- ❏ At least 4 pages
- ❏ Content must be "real" and realistic. Lorem Ipsum text is not acceptable.
- ❏ At least 12 CSS style rules
- ❏ A form
which page? [Contact Us](#)
- ❏ A table
which page? [Setlist, Homepage](#)
- ❏ A list
which page? [Homepage, Packages](#)
- ❏ An external stylesheet
- ❏ An internal stylesheet on at least one page
which page? [Homepage, About Us, Setlist, Packages, Reviews and FAQs, Contact Us](#)
- ❏ An inline style
which page and element? [Homepage, About OneCityBlock paragraph, line 183 of home.html](#)
- ❏ File sizes checked for all images
- ❏ Two images – one must be a background image.
which page for background img? [Homepage](#)
which page for other image? [Homepage, About Us, Reviews and FAQs](#)
- ❏ At least two fixed page elements to make the site look consistent
what are they? [Header/Navigation Bar and the Footer](#)
- ❏ The site was tested on a phone.
- ❏ Site passes mobile friendly test
Which test did you use? <https://pagespeed.web.dev/>
Copy screen shot of the results below.

****ChatGPT was used to generate the images and content seen on the website****

Are there any extra features you added that are not listed above?

I added an accordion FAQ section, which is not a feature listed above. I found a simple representation of it on Stack Overflow and was able to replicate it on my page to create an interactive FAQ section.

What site(s) did you look at for design inspiration?

While creating my website I tried to look at as many cover band websites as possible for color, design, and functionality inspiration. I found some design ideas from:

- https://elegantmusicgroup.com/the-best-band-dj-hybrid/?utm_source=Google&utm_medium=cpc&utm_campaign=NJ%7CWeddingHybrid&utm_term=%7Bkeyword%7D&gad_source=1&gad_campaignid=18287500735&gbraid=0AAAAACtOKLgcQ2scPskJma2tcoKLZXKUx&gclid=CjwKCAiAqKbMBhBmEiwAZ3UboO2fCl6hTpMxT6XpTFuVQkv4WNXYejYAOOH-mYFt4ThIO-exHdQq2RoC35EQAvD_BwE
- https://www.kingofheartsent.com/?gad_source=1&gad_campaignid=21768211397&gbraid=0AAAAA9wjwFqB6TCX8V14SgPNOI5HhDWEB&gclid=CjwKCAiAqKbMBhBmEiwAZ3UboLKP4d36jJV7WR3wOVcfEnuvxdIwaD3qATvxz5jKhoC4_MQAvD_BwE
- <https://www.redlionnyc.com/>

What would you add to this project if you had an extra week?

While researching the accordion FAQ section I saw some cool transition examples that made the FAQ transitions smoother. I think implementing a more natural transition would make the FAQ section look a lot better. I also think that if I had an extra week, I would clean up the CSS rules I implemented when creating this website. This was an eye-opening experience that emphasized the importance of planning everything out before working. There are very similar rules implemented on a few pages that could be included in the external style sheet to reduce the clutter on each page. I also think since I'm new to HTML that its very likely that I wrote some rules that overwrote/nullified others. While the website is functional, I recognize that it would be very time consuming for someone else to look at and understand the code. Thus, if I had another week for this project my main focus would be on making the code cleaner and more organized.
